ACCELERATED MOBILE TESTING NIRVANA

## EXPERIENCE THE DELIGHT OF A VERSATILE MOBILE TESTING TOOL

An **accelerator BOT** for **manual** and  
**automated** testing of mobile applications  
developed for **Android** and **iOS** devices

# The New Era of Error-free Mobile Testing across the Spectrum

## 5X Productivity

Increase your productivity by eliminating repetitions, decreasing go-to-market time and enhancing testing accuracy every time

## No Coding

Create automated testing programs without writing any code. Now testers without programming knowledge can also become full stack testers

## Farm of Mobile Devices

Access actual devices in real time with different generations of Operating Systems for 100% coverage of the ecosystem

## Harness AI & ML

Use the inbuilt tool intelligence to re-apply test cases to recurrent situations and instances

## Peace for Mobile Testers. Definite Assurance for Businesses

- No Program Coding
- Script Recording
- Real Time Multi Device Testing
- Complete Automated Testing
- Flexible & Affordable Pricing

## VERSATILE MODULES FOR POWER PACKED PERFORMANCE

### **BOT™ Automator**

BOT™ Automator allows script recording on one device and execution of script on multiple devices. Enables tester to run recorded script on multiple devices for regression testing purpose in SIT or UAT environments

### **BOT™ Replicator**

BOT™ Replicator helps in testing on multiple devices in real time. It is primarily useful for manual testing on multiple devices, treating one as master and the rest as slaves

### **BOT™ GUI based Script Editor**

Allows user to parameterize script for incorporating multiple test scenarios. User can prefer to edit the values in script on GUI based script editor. Alternatively, user can link test data sheets with the script and run multiple test scenarios using same script

### Sharing of scripts

BOT<sup>m</sup> allows storage and sharing of Automated Regression Testing scripts amongst testers, which enriches collective knowledge

### Dashboards and MIS

- Features include easy access control tools for analyzing test execution
- a. View device logs with detailed steps after executing any script
  - b. Capture & analyze device performance parameters
  - c. Customized insights

### Access Real Mobile Devices

BOT<sup>m</sup> cloud provides online access to mobile devices, which testers can pick and use for a required time. From latest Android and iOS devices all the way up to 5 year old releases

## DEPLOYMENT

### On Premise

Infrastructure provided by Client / AQM.  
BOT<sup>m</sup> software provided by AQM

### On Cloud

Access from anywhere.  
Test anywhere & on any device
